

ONLINE LEARNING SYSTEM

Abstract

An online learning platform is filled with educational content with many different subject .Building an online learning platform give learners the opportunity to search and pay for online learning directly

The benefit of building an online learning web application is that it would be user-friendly, fast, and cost effective another vital benefit to e-learning is that it is self-directed means that the e-learners set the pace of their learning.

unlike traditional educational methods, learning allows students to pace their educational needs with their comfort level this is especially true when a person chooses to use eLearning for personal accomplishment
